## Individual and Family Guidance to Protect Against COVID-19

The best way to prevent illness is to avoid being exposed to this virus. The masking, social distancing, and other safety precautions included in these guidelines reduce the risk of spreading COVID-19, but do not eliminate the risk entirely. We can all take these actions to protect ourselves, our families, and others throughout our communities. This applies to people who have already been vaccinated, too.

Always:

- Stay home when sick;
- Stay at least 6 feet apart from other people;
- Wear facial coverings while indoors and outdoors;
- Wash your hands often;
- Cover your mouth and nose when you cough or sneeze;
- Don't touch face (mouth, nose, eyes) after touching a surface without washing/sanitizing hands;

What do I do if I cannot leave my home but want to get the vaccine? Florida seniors who cannot leave their homes but in need of a COVID-19 vaccine should email: **HomeboundVaccine@em.myflorida.com** with your name and phone number and someone will get back to you about setting up an appointment, according to the Florida Division of Emergency Management, which is tasked with the state's vaccine distribution.

If I already had COVID-19 and recovered, should I still get the vaccination? The COVID-19 vaccination should be offered to you regardless of whether you already had COVID-19 infection.

Do I still need to wear a facial covering and practice social distancing if I have received the vaccine? **Yes!** While experts learn more about the protection that COVID-19 vaccines provide under real-life conditions, it will be important for everyone to continue using **all the tools** available to us to help stop this pandemic, like wearing a facial covering, washing hands often, and staying at least 6 feet away from others. Together, COVID-19 vaccination and following CDC's recommendations for how to protect yourself and others will offer the best protection from getting and spreading COVID-19.

When can I stop wearing a facial covering and stop social distancing from others after I have been vaccinated? There is not enough information currently available to say if or when CDC will stop recommending that people [wear masks](#) and [avoid close contact with others](#) to help prevent the spread of the virus that causes COVID-19. Experts need to understand more about the protection that COVID-19 vaccines provide before making that decision. Other factors, including how many people get vaccinated and how the virus is spreading in communities, will also affect this decision.

What is Herd Immunity? Herd immunity is a term used to describe when enough people have protection—either from previous infection or vaccination—that it is unlikely a virus or bacteria can spread and cause disease. As a result, everyone within the community is protected even if some people don't have any protection themselves. The percentage of people who need to have protection in order to achieve herd immunity varies by disease.

What percentage of the population has to be vaccinated to have herd immunity to COVID-19? Experts do not know what percentage of people would need to get vaccinated to achieve herd immunity to COVID-19.

What to do if I feel that I was exposed to COVID-19? The Florida Department of Health recommends that you call your primary doctor or the county health department to describe your symptoms. They will decide whether you need to be tested. If you wish to speak to someone, the Florida Department of Health has established a Call Center available 24 hours a day, 7 days a week at 1.866.779.6121

If at any point, you feel that you need emergency personnel, please dial 911 and inform the call taker that you may have been exposed to COVID-19.
